

Nathan Ho

(209)990-2164 | nathanho30@gmail.com | www.linkedin.com/in/nathanho27 | San Francisco, CA | <https://github.com/nathanho27>

Education

University of California, Davis

Expected: Jun 2027

Master of Science, Business Analytics

University of California, Santa Barbara

Jun 2025

Bachelor of Science, Statistics and Data Science

Relevant Courses: Statistical Data Science, Time Series Analysis, Regression Analysis, Big Data Analytics

Technical Skills

Programming & Databases: Python, SQL (PostgreSQL, SQLite, MySQL), R

Data & Visualization: Excel (Pivot Tables, Lookup Functions), Tableau, Power BI, Streamlit, Git/GitHub

Platforms & Cloud: Apache Spark, Google Cloud Platform (BigQuery), AWS, Azure

Projects

Market Risk Modeling System (Apr 2026 – Present) | github.com/nathanho27 | Python, SQL, AWS, Streamlit:

- Engineered an end-to-end market risk modeling system using Python, PostgreSQL, and SQL to ingest, transform, and analyze S&P 500 equity data into predictive risk signals through a layered analytics architecture.
- Created machine learning models to estimate 10-day downside risk probabilities and integrated an AI-assisted explanation layer using large language models to translate model outputs into interpretable risk summaries.

Payment Network Market Analysis (Jan 2026 – Apr 2026) | github.com/nathanho27 | Python, SQL, Tableau:

- Built a Python and SQL analytics pipeline using a MySQL database to evaluate Visa and Mastercard performance relative to the S&P 500, analyzing growth, volatility, and risk-adjusted returns to assess competitive positioning.
- Developed Excel-based financial models and Tableau dashboards to analyze market trends, correlations, and risk-return dynamics across different market conditions.

Music Listening Behavior Analytics (Dec 2025 – Jan 2026) | github.com/nathanho27 | Python, SQL, Tableau:

- Developed a longitudinal analytics workflow using Python and SQL to analyze cross-platform Spotify and Apple Music listening behavior, including event-level engagement tracking.
- Designed interactive Tableau dashboards to visualize listening trends and user engagement over time.

Yelp Business Intelligence Platform (Nov 2025 – Dec 2025) | github.com/nathanho27 | Python, SQL, Power BI:

- Built an end-to-end business intelligence solution using Python and PostgreSQL to ingest, clean, and model Yelp API data into structured pricing and rating analytical tables.
- Modeled KPI datasets to deliver Power BI dashboards to support pricing analysis and performance benchmarking.

Experience

Undergraduate Research Assistant, UC Santa Barbara

Dec 2021 - Mar 2023

Anthropology Department, Brown Lab

- Processed and analyzed antibody datasets in Excel using standard curve modeling in R, improving efficiency and consistency of statistical workflows.
- Interpreted analytical results and communicated insights to support data-driven decision-making within a research team.

Data Science Fellow, UC Santa Barbara

Sep 2021 - Nov 2022

Center for Black Studies Research (CBSR)

- Developed Python and R scripts to analyze and visualize large-scale datasets on social equity and systemic bias.
- Conducted exploratory data analysis to identify trends and presented insights to faculty advisors.
